## **Eight career starters at b+m – Internship, vocational education, dual studies**

At the start of the new training year, b+m surface systems welcomes four new apprentices and two FOS annual interns. Nina Rosner starts her vocational education as technical product designer, Lars Schnitzer as industrial mechanic, Sven Sorian as industrial manager, and Sebastian Volkert as electronics technician for industrial systems. Both FOS annual interns, Victoria Bock and Nicole Kim, complete a 1-year internship in industrial management.

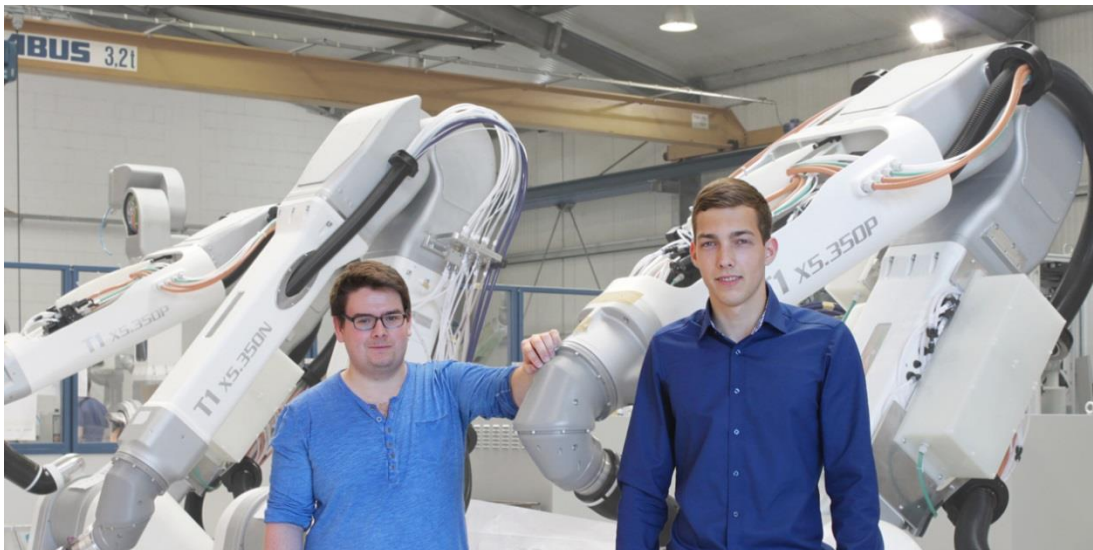

On 1<sup>st</sup> July, Johannes Sirsch and Nils Ueckerseifer, the new bachelor students, have already started their 3-months get-to-know period at b+m, prior to beginning their actual dual studies on 1<sup>st</sup> October in Bad Hersfeld.

---

Thanks to well-filled order books, b+m was able to sustain its growth. The company now counts more than 300 employees – 240 of them in b+m's HQ in Eiterfeld – and currently trains 17 apprentices in six professions, as well as seven students in mechanical and electrical engineering.
