Wim Hoezen Strengthens Sales at b+m surface systems

Wim Hoezen is now strengthening the sales team at b+m surface systems in the Netherlands and Belgium. Hoezen is able to draw on over 45 years of experience in surface technology. After starting out as a technical specialist in the field of surface treatment systems for a chemical company, he later worked in the fields of CDP and thermal paint stripping by a contract coating company. In 1994, Hoezen founded his own engineering company and has worked as a freelance consultant for a major German paint line manufacturer since then. With his move to b+m, Wim Hoezen will now further expand the sales of the East Hessian surface specialist's paint lines into the Dutch and Belgian markets.

Short Profile of b+m surface systems GmbH

b+m surface systems GmbH is a technologically leading manufacturer of fully integrated paint lines. Around 450 employees ensure smooth project implementation and competent service. Important key components, including the two in-house robot series T1 X5 and T2 X5, are manufactured by the Eiterfeld company itself.
